

# ornamental

decorative stonework ideal for the large or small garden

Ornamental stonework can provide emphasis and accent to any garden whether large or small, terraced or open ground. Ever since the British garden was influenced by those of Italy, architectural and ornamental stone has been a contributing factor to the embellishment and magnificence of the Great British landscape.

**Note: Balustrading is for decorative purposes and is not designed to be used in load bearing situations as required in the Building Regulations and in BS 6180. The advice of a Chartered Structural Engineer (with appropriate experience) should be obtained if a load bearing situation is required from balustrade and /or handrail/coping assembly.**

### Balustrading

All rails and plinths are supplied in standard lengths, cutting to final specification to be undertaken by your installation contractor

Each piece is available individually and not as a kit of parts.

The spacing of the spindles is at the installers discretion

\* NB The overall height does not include joints

Thistle
