

romani

create a random patterns with ease

Romani paving with its distinctive face pattern gives a new and unique variation on patio design. This approach has been specifically developed to make it easier to achieve that sought after random flagstone effect.

Size mm (nominal)	No./sq metre
450 x 450 x 38	4.94

rectory

recreate the look of the countryside

Rectory paving gives a convincing rustic countryside look, with its resemblance to old handmade bricks, laid in the traditional basket weave style.

Rectory edging can be used in conjunction with Rectory Paving or it can be most effective when used with other forms of paving to provide a contrasting edge detail, or as a stylish means of breaking up otherwise large areas of slab work.
