

rostrum rustic

the paving system that can reshape the traditional garden

If you are looking for a product that gets away from the concept that paved areas should be straight sided, Rostrum is the answer.

Available in the Rustic range of colours. Individual segments are available in five sizes and are ideal for creating winding pathways in your garden or can be used in conjunction with Rustic paving by incorporating the corner infill sets (available in 3 and 5 piece). Your imagination is the only limiting factor.
